

Foam Animals

Here is a hands-on simple craft where you can make create any type of animal by using foam. For this activity, we created a foam lion and a foam elephant. Foam comes in a variety of colors, is easy to work with, and fun to decorate. The instructions below explains how the foam lion was created.

Materials needed:

- Black and yellow fun foam
- Black permanent marker
- Glue

Procedure:

- Trace the pattern of the lion on the yellow foam and cut out.
- Trace a slightly larger pattern of the same lion on the black foam and cut out.
- Glue the yellow foam lion onto the black foam lion. Let it dry.
- When dry, use the black permanent marker to draw the face and other features.

Now you're done! You can practically make any foam animal using the same procedure. Have fun!
