

Dialogue for video "Help Stop Bullies"

Did you know that 57% of the people we surveyed said they have been a victim of school bullying?

Most kids know what a bully is. Do you?

A bully is someone who tries to harm another person.

They like to control.

They like to have power over someone else.

Bullying can be physical.

Or not.

Bullies hit, kick, push, or threaten violence.

Sometimes a bully ruins or destroys another person's property.

Bullies sometimes call people names.

They tease and insult people.

They spread rumors.

They make people do things they don't want to do.

Some people use the Internet to bully.

They are called "cyberbullies".

People on the Internet can hide their identities.

They invade a place that should be private and safe.....our home.

School disagreements sometimes spill over into after school.

Cyberbullies use email, blogs, websites, cell phones, and text messaging to torment their victims.

Statistics show that people who are bullied experience feelings of

Loneliness, trouble making friends,

Lack of success in school,

Behavior problems.

Bullies make their victims miserable,

And most kids don't tell.

Bullying can cause school violence.

Teachers and parents, please help us feel like we can talk to you.

Take action when we report bullies.

Show us how to be kind by being kind.

Help us stop bullies.
