

## WHAT YOU CAN DO TO HELP THE ENVIRONMENT

- Replace all your traditional light bulbs with energy efficient bulbs.
- Encourage your parents to switch appliances off at home.
- Re-use and recycle when possible
- Walk to school or use public transport, so you use less fuel.
- Don't over charge your mobile, this will save electricity and make your bills cheaper!
- Close doors to conserve energy.
- Put paper in the recycling bin, not the normal bin. Do you really need to write it down? Reuse that paper!
