

Q1: Do you know of any of the environmental problems which the Earth is currently experiencing? If yes, name a few.

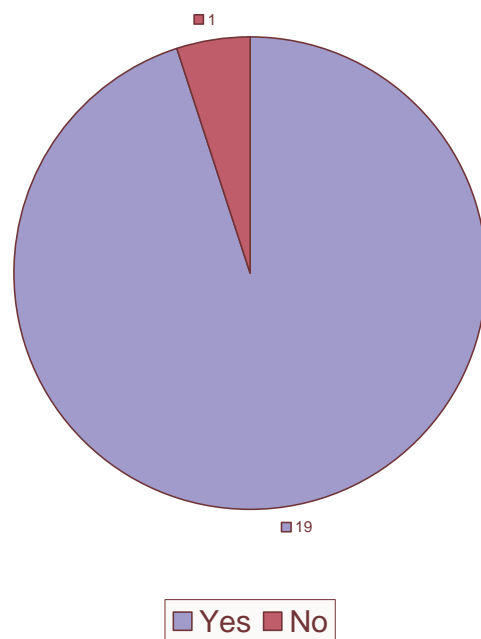

Q2: How did you even begin to know about the environmental problems faced by our planet?

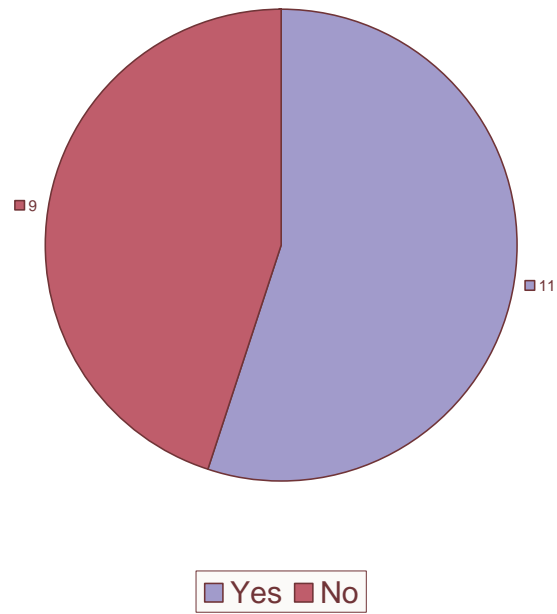

Q3: Do you think that people are conscious enough about the environment (i.e. doing what they can to help the environment, e.g. recycling paper)?

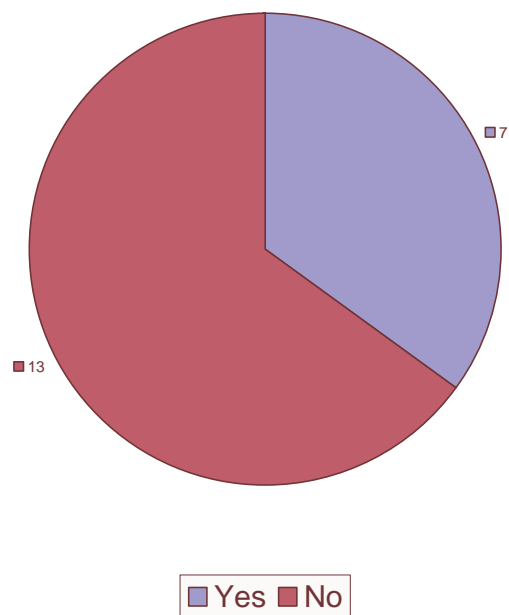

Q4: Do you think it is important to help save the environment?

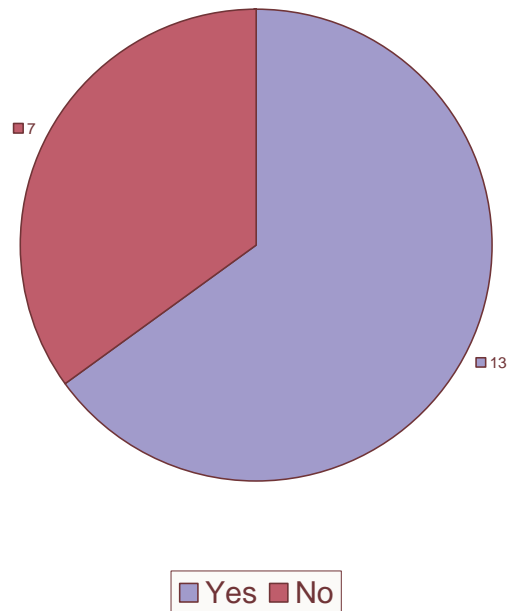

Q5: Do you try to do your part to help save the environment (e.g. recycle paper)?

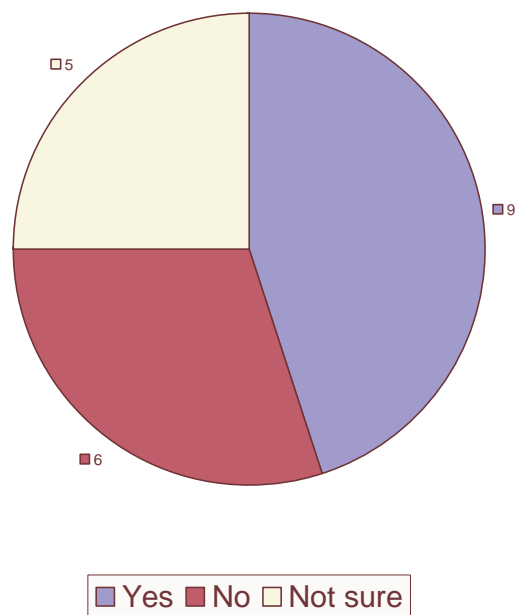

Q6: Do you think that promoting the 3R's (reuse, reduce, recycle) is enough to encourage people to help save our environment?

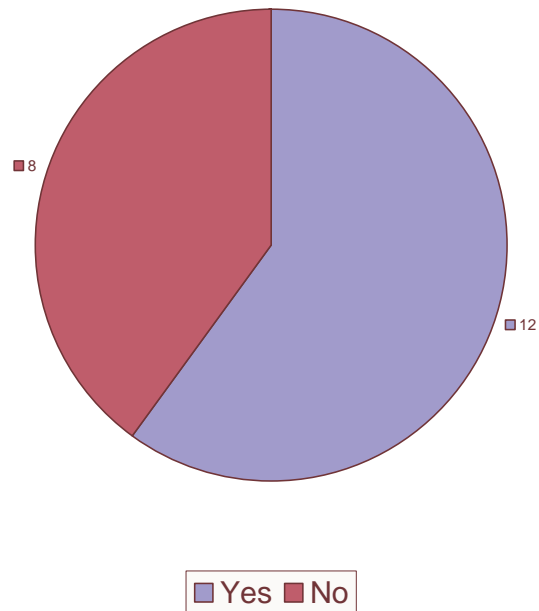

Q7: Do you think that the government and environmental agencies have done a good job in promoting environmental awareness?

Q8: Are there any recycle points around your home to help you recycle?

Q9: Do you think that rewarding people will encourage more people to help save the environment?

Q10: Do you know anything about any renewable energy source currently being used (e.g. hydrogen fuel cells, solar power)?
