

Cleaning Pennies

Choose three cleaning products or solutions and predict how well it will clean the penny.
Write down your observations. When all three are done, compare the results and write your conclusions
about which solution or product cleaned better and why you think it did.

FIRST:

Solution/product I am using:

My prediction about how it will work:

My observations:

SECOND:

Solution/product I am using:

My prediction about how it will work:

My observations:

THIRD:

Solution/product I am using:

My prediction about how it will work:

My observations:

Conclusions:
