

Electron Configuration Quiz

1. Elements on the left side of the main portion of the elemental table fill what kind of orbitals?	A. s B. p C. d D. f
2. The transition elements fill what kind of orbitals?	A. s B. p C. d D. f
3. The lanthanide and actinide series fill what kind of orbitals?	A. s B. p C. d D. f
4. On the right hand side of the main body of the elemental table the elements fill orbitals with what name?	A. s B. p C. d D. f
5. Where in the atom are electrons found?	A. nucleus B. electron cloud C. inside protons D. inside neutrons
