

Lethal Weapon.

Stats N' Facts

Stonefish.

↵

Click on the words in blue for the definition.

Description: The Stonefish is a greenish brown color. It looks like a rock. It has 13 grooved spines on its back. It is 30 centimeters long. It looks like a rock and can also be called a rockfish. ↵

↵

Habitat: It usually lives above the Tropic of Capricorn on coral reefs. It just lies dormant in the sand or mud. ↵

↵

Diet: The Stonefish eats small fish or shrimp. ↵

↵

Of Young: It lays eggs. It may produce a million eggs but only a small proportion survives to maturity. The eggs stay in the female's body until they hatch. When
